

RANJITA GANESH NAIK

Bangalore, Karnataka — +91 9019532651 — ranjitanaik062@gmail.com

LinkedIn — GitHub — Portfolio

Objective

Second-year B.E. Computer Science Engineering student with a strong interest in Artificial Intelligence and Machine Learning (AI/ML). Passionate about solving real-world problems through technology and building practical software solutions. Skilled in Python, Java, frontend development, and problem-solving, with hands-on experience in developing responsive web applications and learning modern AI technologies.

Education

Sapthagiri NPS University, Bangalore	2024 – 2028
B.E. in Computer Science & Engineering	CGPA: 9.24
Jawahar Navodaya Vidyalaya, North Canara, CBSE	2024
Class XII	85.4%

Technical Skills

- **Programming Languages:** Python, Java, JavaScript
- **Web Development:** MERN Stack, React, Node.js, Express.js, MongoDB, HTML, CSS
- **Database & Tools:** MySQL, Supabase, Git, GitHub, VS Code, Vercel
- **Core Concepts:** Data Structures & Algorithms, OOP, Computer Networks, Operating Systems

Projects

Dhwani AI — AI-Powered Patient Engagement System

HTML, CSS, JavaScript, Node.js, Express.js, Supabase, Twilio, Groq AI

- Developed an AI-powered healthcare platform for automated medicine reminders and multilingual patient interaction.
- Integrated Twilio voice APIs and AI-based response analysis for real-time healthcare communication workflows.
- Designed scalable backend systems for patient data management and intelligent response processing.

Public Grievance Redressal System — Smart Complaint Management Platform

Python, Flask, MySQL, HTML, CSS, JavaScript

- Developed a web-based grievance platform enabling citizens to report and track public complaints digitally.
- Implemented complaint categorization, officer assignment, notifications, and real-time tracking features.
- Improved transparency and complaint resolution efficiency through centralized management workflows.

ThailaVardhana — Oil Palm Farmer Support Platform

React, Node.js, MongoDB, Tailwind CSS

- Built a smart platform supporting oil palm farmers with crop advisory, financial planning, and income tracking.
- Developed responsive frontend interfaces and integrated backend services for farmer support management.
- Focused on improving sustainable farming awareness and rural digital accessibility.

Predicting Heart Disease — Disease Risk Prediction System

Python, Machine Learning, Pandas, NumPy, Scikit-learn

- Developed a machine learning-based system to predict heart disease risk using patient health parameters.
- Processed and analyzed medical datasets using Python libraries for prediction accuracy improvement.
- Demonstrated practical AI applications in healthcare and predictive analytics.

Hackathons & Competitions

HackMatrix 2.0 — 2nd Place Winner

IIT Patna · 36 Hour Hackathon

Dhwani AI — AI-Powered Patient Engagement System

- Secured 2nd position at HackMatrix 2.0 conducted at IIT Patna in collaboration with JioHealth and NJACK.
- Participated in a 36-hour hackathon focused on AI-powered healthcare communication solutions.

Smart India Hackathon (SIH) — Grand Finalist

36 Hour National Hackathon

ThailaVardhana — Oil Palm Farmer Support Platform

- Secured Top 3 position as a Grand Finalist for developing a digital platform supporting oil palm farmers.
- Collaborated in a 36-hour hackathon environment to solve real-world agricultural challenges.

The Big Hack — 24 Hour Hackathon

Acharya Institute of Technology

Cyber Lens — AI-Based UFDR Report Analysis Tool

- Participated in a 24-hour national-level hackathon focused on cybersecurity and digital forensic solutions.
- Contributed to the development of an AI-powered forensic report analysis system for investigation workflows.

Certifications

- Introduction to Linux — Linux Foundation
- Introduction to Modern AI — Cisco
- Apply AI: Analyze Customer Reviews — Cisco
